

# Visitor Parking Information

## 5718 Westheimer

There are two entrances for the 5718 Westheimer parking garage. One entrance is from Westheimer Road and the other entrance is from Bering Drive. Parking at 5718 Westheimer is free.

FizerBeck has three (3) reserved visitor spaces on the ground level of the 5718 Westheimer parking garage. The reserved visitor spaces are located just before the garage elevators, and facing the interior of the garage.

After parking (if parked in the garage), please proceed toward the garage elevators and follow the skywalk into the building. Take the last elevator bank on the right (past the security guard station). If you parked in the visitor parking in front of the building, enter through the front of the building and take the elevator bank on the left side. Visitors and guests will not need to check in with Building Security upon arrival.

The building has ten accessible parking spaces that will accommodate a van, nine in the garage and one in the short-term visitor parking in front of the building. There are two van accessible spaces on the ground floor of the parking garage, and one on each floor above the ground floor on the west side of the garage elevator bank. If both ground floor spaces are full, please contact building security via the intercom at the contract parking entrance to get access to one of the spots on a higher floor. Alternatively, van accessible vehicles can be parked in front of the building in the location marked with the red X.

Our office is located at Suite 1750 on the 17th Floor.
